Heating Instructions

Please consider before cooking:	Keep frozen until use. Do not overcook. Appliance temperatures may vary. Please consider the performance of your appliance when following these cooking directions. Always wear protective eyewear and clothing in case of splatter or discharge.
Restaurant use- Commercial deep fryers	Preheat enough oil at 350-360 °F (176-182 °C) to cover the cups. Place up to 1 lb. of yuca cups. Do not overload basket and carefully lower basket into hot oil. Fry for 2-3 minutes. Do not overcook.
Oven instructions:	Preheat oven to 350 °F. Grease an oven-safe sheet and bake for 10-12 minutes. Salt to taste, serve warm.

CAUTION! Ice crystals on frozen foods and pockets of moisture within can cause splattering when added to hot oil. Add product carefully and cover. When cooking: Always preheat, oil uncovered. If oil splatters, cover immediately and reduce heat. When splattering stops, remove cover and return to cooking temperature. Be careful not to spatter or spill oil onto hot burner of range. Do not overcook! After cooking: Carefully remove product from fryer. To avoid risk of burns and other injury, let fries cool for at least one minute in basket before serving as contents may continue to splatter.
